DESPATCH:

1x 80606-17 / WHUTELL-COL 1.1

Step 1) Connect the relays

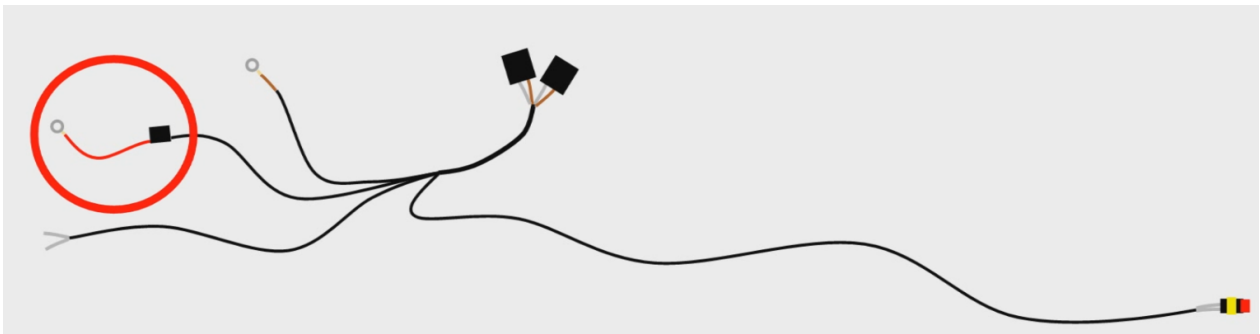

Step 2) Cable tie the relays in place**Step 3) Remove the earth bolt****Step 4) Connect the earth cable to the earth point and re-install the bolt**

Step 5) Open the battery cover and remove the nut shown

Step 6) Attach the power cable to the thread and re-install the nut. Close the battery cover

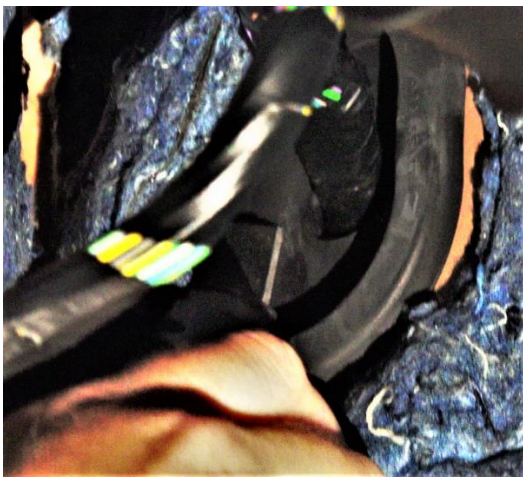

Step 7) Remove the plastic caps and rubber seal to expose the wiring behind the kick panel

Step 8) Locate the cab entry point from the interior

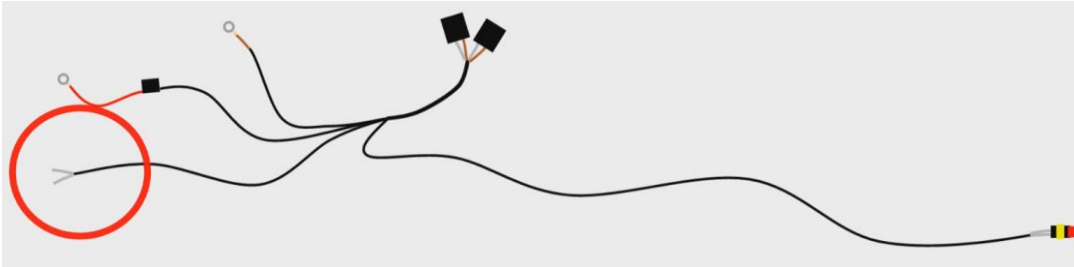

Step 9) Make a small incision in the cab entry rubber seal

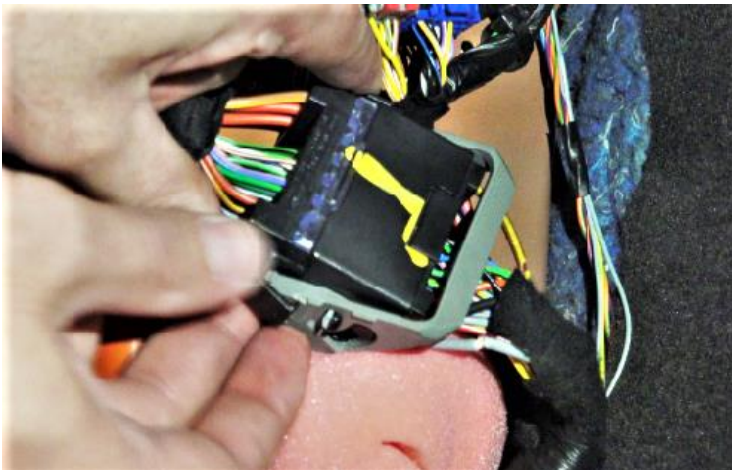

Step 10) Insert a wire through the incision

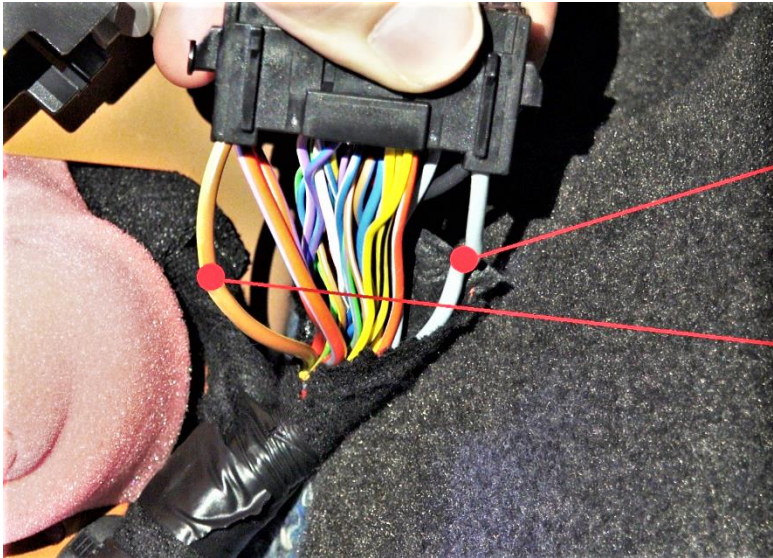

Step 11) Tape the Lock/Unlock cable to the wire and draw it back through into the cab interior

Step 12) Behind the kick panel, undo the plug to make it easier to access the wires

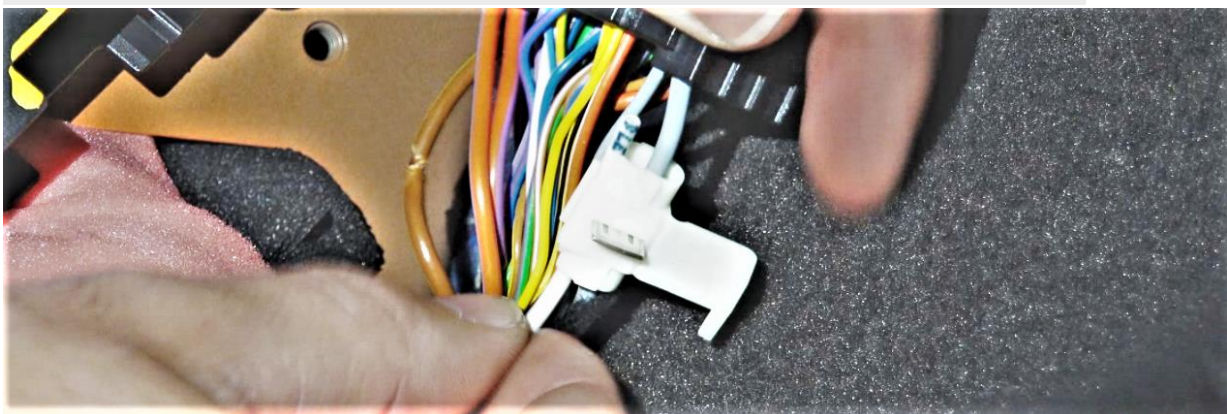

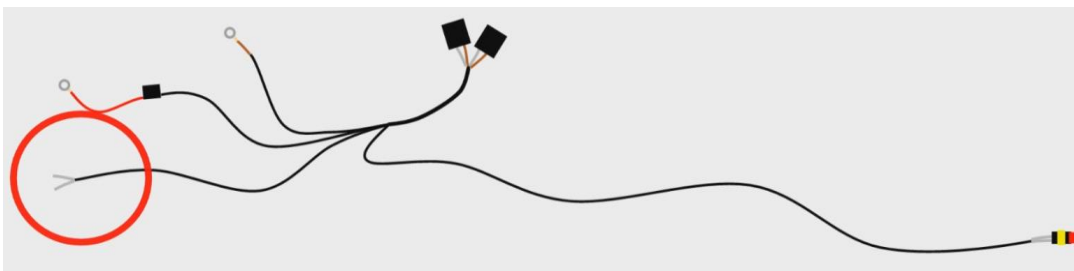

Step 13) Identify the wires with the colour blends indicated

Step 14) Place one of the provided clips over the Grey wire

Step 15) Insert the labelled 'Lock' into the plastic clip alongside the Grey/Brown wire

Step 16) Clamp the clip closed until the metal plate is no longer protruding, and close the clip

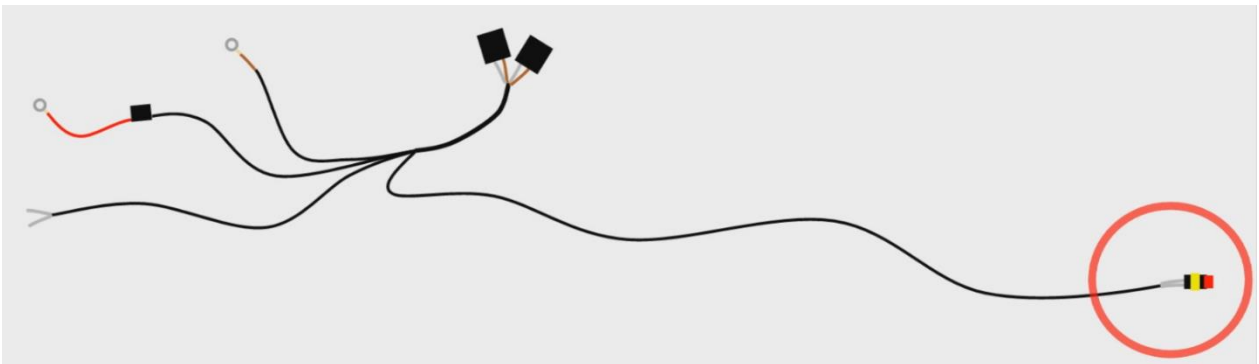

Step 17) Repeat Steps 14-16 for the Brown/Yellow wire

Step 18) Insert the plug back into its socket

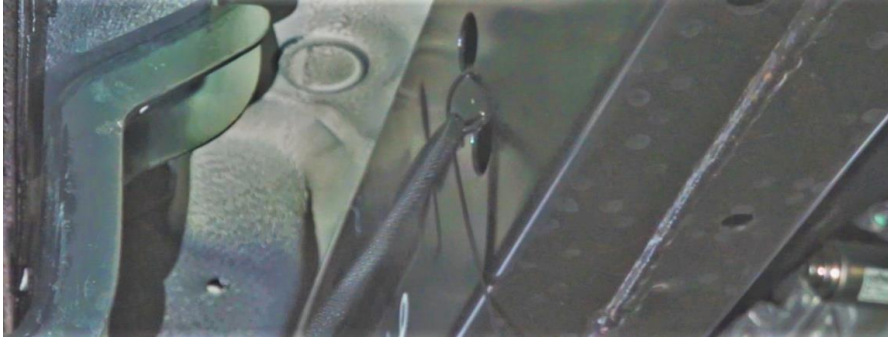

Step 19) Re-install the plastic caps & rubber seal in the passenger's side door

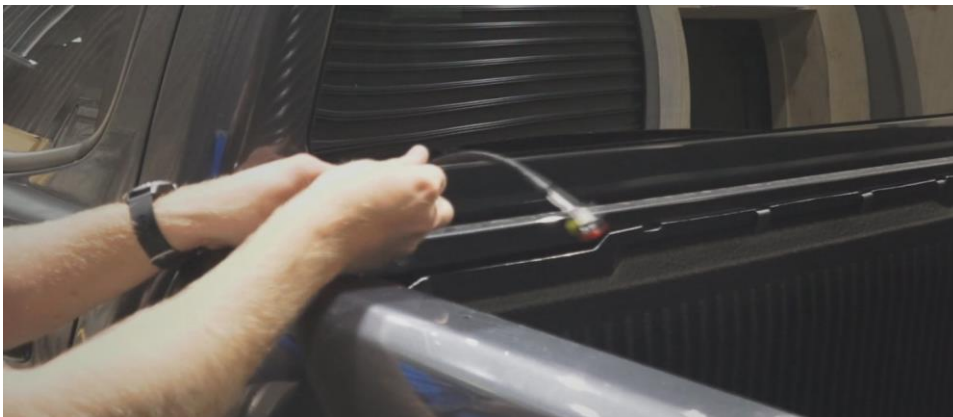

Step 20) Take the last cable remaining on the loom and feed it down the firewall so it comes out underneath the vehicle

Step 21) Run down the length of the chassis and cable tie in place

Step 22) Pull up through the gap between the cab and wellside

Step 23) Install the Load-Lid as per fitting instructions provided

Step 24) Connect the vehicle wiring loom to the plug already installed in the Load-Lid

Step 25) Cable tie any slack cables safely out of sight and where they won't hinder moving parts

Your central locking is now fully fitted and ready to use.
